# **UNIT 4-WHAT THE FUTURE HOLDS**

**SKILL: Reading for Comprehension** 

Text: Africa's fastest-growing cities

Source: REUTERS, 04 May 2016

#### **LESSON CONTENT:**

Language function	Expressions and structures	Vocabulary
Expressing a completed action in the future	By the year 2060, the population in megacities <b>will have doubled</b> .	urbanize, slum, growth, pull factor, push factor, speed, outcome, brain drain, issue, countryside, employment, powerhouse, sustained, upheaval, shortage, implement, tipping point, turbocharged

# **Learning context**

The students of Terminale A5 of Lycée Moderne Bongouanou are reading an article about climate change from the American Newsweek to prepare their participation in a debate on the future of humanity during the next meeting of the English club.

# Before you read

# **Brainstorming**

- 1. List three potential dangers the modern world can face in the next 10 or 20 years.
- 2. What can be the causes of each of these potential dangers?

# Vocabulary

- Outcome: result
- Countryside  $\neq$  urban area
- Pull factor: attracting reason,
- Push factor ≠ pull factor
- Turbocharged = fast

# **Language function:** Expressing a completed action in the future **Example:**

- By May 15, most of the teachers would have finished their programs.
- We are in 2020; I think we would have completed all our university degrees by 2028.

#### WHILE-READING ACTIVITIES

Read the text below and do all the activities related to it.

## Africa's fastest-growing cities

The world is moving to the city. No part of the planet is urbanizing faster than sub-Saharan Africa. The continent's population of roughly 1.1 billion is expected to double by 2050. More than 80% of that growth will occur in cities, especially slums. Take the case of Ouagadougou, capital of Burkina Faso, which is experiencing a population growth of 7.2% while Mbouda in Cameroon is the continent's fastest growing city at 7.8% annually. Keep in mind that the average global urban population growth rate worldwide is currently 1.84% a year. These figures show the preoccupying character of the population issue in Africa.

The continent's turbocharged urbanization is driven by several factors. First, there is what is called organic population growth; that is, the natural expansion of population due to the surplus of births over deaths, a phenomenon driven, in Africa's case, by persistently high fertility rates. Second, there is in-migration from rural areas within countries and immigration or migration across borders from foreign countries.

This rural-to-urban migration in Africa is driven by both *pull* and *push* factors. Pull factors draw rural populations into the city and include economic opportunities, employment, better connectivity, access to essential services and education. Push factors drive people out of rural environments, and they include rural conflicts, environmental degradation, climate change, and resource shortages. These factors can work together to create a vicious cycle, where poor rural conditions are exacerbated by a brain drain as people leave the countryside looking for a better life in town.

Some optimists are convinced that Africa's sustained population growth will be driving to innovation, employment and economic growth, with the black continent supplanting China as the world's manufacturing powerhouse. Pessimists are concerned that the continent's cities could become overstressed through rapid, unplanned urbanization, generating political, economic, and environmental upheaval.

Anyway, one thing is for sure: the outcome of this unprecedented urban transition depends on what Africa's political, business and civic leaders do next. For instance, one can reasonably think that if strict family-planning policies are not implemented, the population of sub-Saharan Africa is going to remain high. Some experts predict that by mid-2030, it will have reached 2 billion. By that period, poverty will have increased everywhere on the

continent and criminality will have intensified. Many African cities are therefore at a tipping point.

## Activity one: Read the text quickly and choose the right options

#### The main issue in this text is:

a. poverty in Africa

b. malnutrition in Africa

c. overpopulation in Africa

d. pollution in Africa

<u>Activity two</u>: Match each word or expression from the text in column A with its synonym or definition in column B. One item in column B is not concerned. Write your answers like in the example.

## Example: 1. f

Column A	Column B	
1. growth (L.3)	a. attract	
2. slums (L.4)	b. non-return stage	
3. worldwide (L.7)	c. executed, applied	
4. issue (L.9)	d. absences	
5. employment (L.18)	e. very poor living places of a city	
6. shortages (L.21)	f. increase, augmentation	
7. brain drain (L.22)	g. job opportunity	
8. powerhouse (L.26)	h. problem	
9. upheaval (L.29)	i. everywhere in the world	
10. implemented (L.33)	j. disruption, disorder	
11. tipping point (L.37)	k. emigration of qualified and talented workforce	
	1. leader	

<u>Activity three</u>: Read the text and decide if each of the following statements is true or false. Write **T** for true and **F** for false. Then justify your answers by quoting the lines. Write your answers like in the example.

#### **Example:** 1. F (L. 1)

- 1. Sub-Saharan Africa is less affected by urbanization than other areas of the continent.
- 2. The African population has doubled recently.
- 3. Two African capitals are mentioned in the text.
- 4. The city with the fastest growth rate is in Burkina Faso.
- 5. The global world population growth is lower than the African population growth.
- 6. In-migration takes place from one country to another country.
- 7. Rural-to-urban migration in Africa is motivated by three factors.

- 8. Fast population growth is unanimously condemned by all the Africans.
- 9. The solutions to the population problems in Africa should mainly come from African leaders.
- 10. According to some experts, the African population will reach 2 billion before 2030.
- 11. Criminality will decrease over the same period.

# **COMMUNICATIVE ACTIVITY**

Next week, BBC Africa is going to organize a debate on the following topic:

"Is the fast population growth in Africa a strength or a weakness?"

As a future participant in this debate,

- State your opinion about the issue raised.
- Support your position with arguments and examples.
- Record your answer and send it to your English teacher for editing before submitting it to the BBC the day of the debate.

## ADDITIONAL ACTIVITY

Watch the video and list the causes of overpopulation.
